### GUNS / CHOKES

Firearms should be transported in a lockable gun-case and bring a soft gun-bag for use in the fields. Either 12ga or 20ga are suitable for wing-shooting. For chokes, improved/modified for double guns and modified for single barrels are recommended with screw-in chokes providing flexibility. In a country away from gunsmiths it is important to ensure your guns are in good working order for high-volume shooting. Bring extra parts for repair if you have them. For any of the "Big Five" the law requires a minimum calibre of .375 H&H. For plains game any calibre from 270 upwards. A good variable scope is recommended as shots range from close quarters in thick bushy conditions, to fairly long shots up to 300 yards in open plains.

### AMMUNITION

All shotgun ammunition is excluded and is quoted per box 25 (lead). (Please request rates for current year). Excellent, imported 12 and limited 20 gauge is available. We supply imported 2 ¾ shotgun shells from Italy, Spain and Czechoslovakia (e.g. Focchi, Nobel Sport, Clever) between 7 ½ - 3's depending on the species. You are allowed to import no more than 5kg (11lb) of ammunition per hunter. This is for that person's use **ONLY** and excludes ammunition with explosive or incendiary projectiles. Ammunition must be transported in a lockable box/hard case separately from your firearms and may only be carried as checked luggage and some airlines will require notification and approval in advance. **Please confirm these rules with your specific airline as they can change.** Hired rifles include ammunition, specialised ammo is charged extra. If you are temporarily importing your rifles, please bring ammo or purchase from Umdende Safaris on arrival - Prior notice of at least 45 days.

Clayton Comins uses the following imported 2 ¾" lead shells for Bird Hunting:

- Doves and Pigeons – No. 7 and 7 ½, 24 gram or 28gram
- Guinea Fowl & duck – No. 5 and 6, 34 grams
- Partridge – No. 7, 28 grams
- Geese – No.3, 34 grams
